ICE & SNOW

MOCK-UP PERFORMANCE TESTING

FOR ICE & SNOW ACCUMULATION

Help us eliminate “Falling Ice & Snow” signs!

- INVESTIGATE PERFORMANCE
- REFINE DESIGN DETAILS
- DEVELOP MITIGATION
- VALIDATE & CUSTOMIZE STRATEGIES
- COMPARE OPTIONS

Architectural & Microclimate Consulting

Accumulation, Behavior, Mitigation and Management of Ice, Snow and Melt Water on Buildings and Structures.

We Plan for Winter!

Benefits of Performance Testing:

- **Validate** and **Improve** Winter Performance
- **Integrated** or **Customized** Mitigation Strategies
- **Reduce** Design and Operational Risk
- **Lessen** effort for Building Operations

Let us provide you with results by:

- Reviewing design drawings to identify issues
- Recommending the design details to be investigated
- Coordinating mock-up design and construction
- Developing a detailed test plan
- Sourcing the appropriate test equipment and facility
- Coordinating delivery, setup and instrumentation of mock-up
- Directing and Monitoring testing
- Providing immediate feedback and recommendations
- Collecting and reporting of test results
- Guidance for Snow Clearing and Removal from Building Surfaces
- On-going Improvement, Training and Contact Lists
- Action Plan and Observation / Inspection Form Templates

Specializing in the **Reduction of Operational and Management Risk** for Building Owners and Managers.
